## S U M M A R Y

This compilation brings together market statistics for 1964 and 1965, as derived from the reports of Federal Order No. 4 milk handlers and various agency sources. The years 1964 and 1965 were the initial two for the expanded Delaware Valley marketing area, encompassing the original Philadelphia area, Wilmington, Delaware, and the Southern portion of the State of New Jersey.

### Prices

Minimum uniform and classified milk prices all registered average year-to-year increases in 1965. Uniform paying prices to producers advanced an average 18 cents per hundredweight to \$5.37. The Class I milk price rose 23 cents from 1964, averaging \$5.85; Class II milk prices through the year averaged \$3.325 per hundredweight, for a gain of 8.2 cents. The total payment obligation of handlers for producer milk received was \$103.7 million, \$2.4 million above the 1964 value.

### Producer Receipts and Utilization

Milk deliveries by Order No. 4 milk producers declined 1.3 percent in 1965, to 1,917.8 million pounds. Over the year, the average number of plants (72) receiving producer milk decreased by 11, including a net reduction of three cooperative association supply plants beginning with July 1965. Handlers utilized 1,513.7 million pounds of producer milk for Class I, 1.7 percent less than during 1964, and a Class I milk proportion (79 percent) which was a fraction of a percent below the previous year. Monthly, an average 5,387 milk producers supplied the market, delivering a daily mean of 976 pounds per dairyman. Seasonally, daily milk deliveries per producer peaked at 1,081 pounds in May, and were at a low of 925 pounds during October and July.

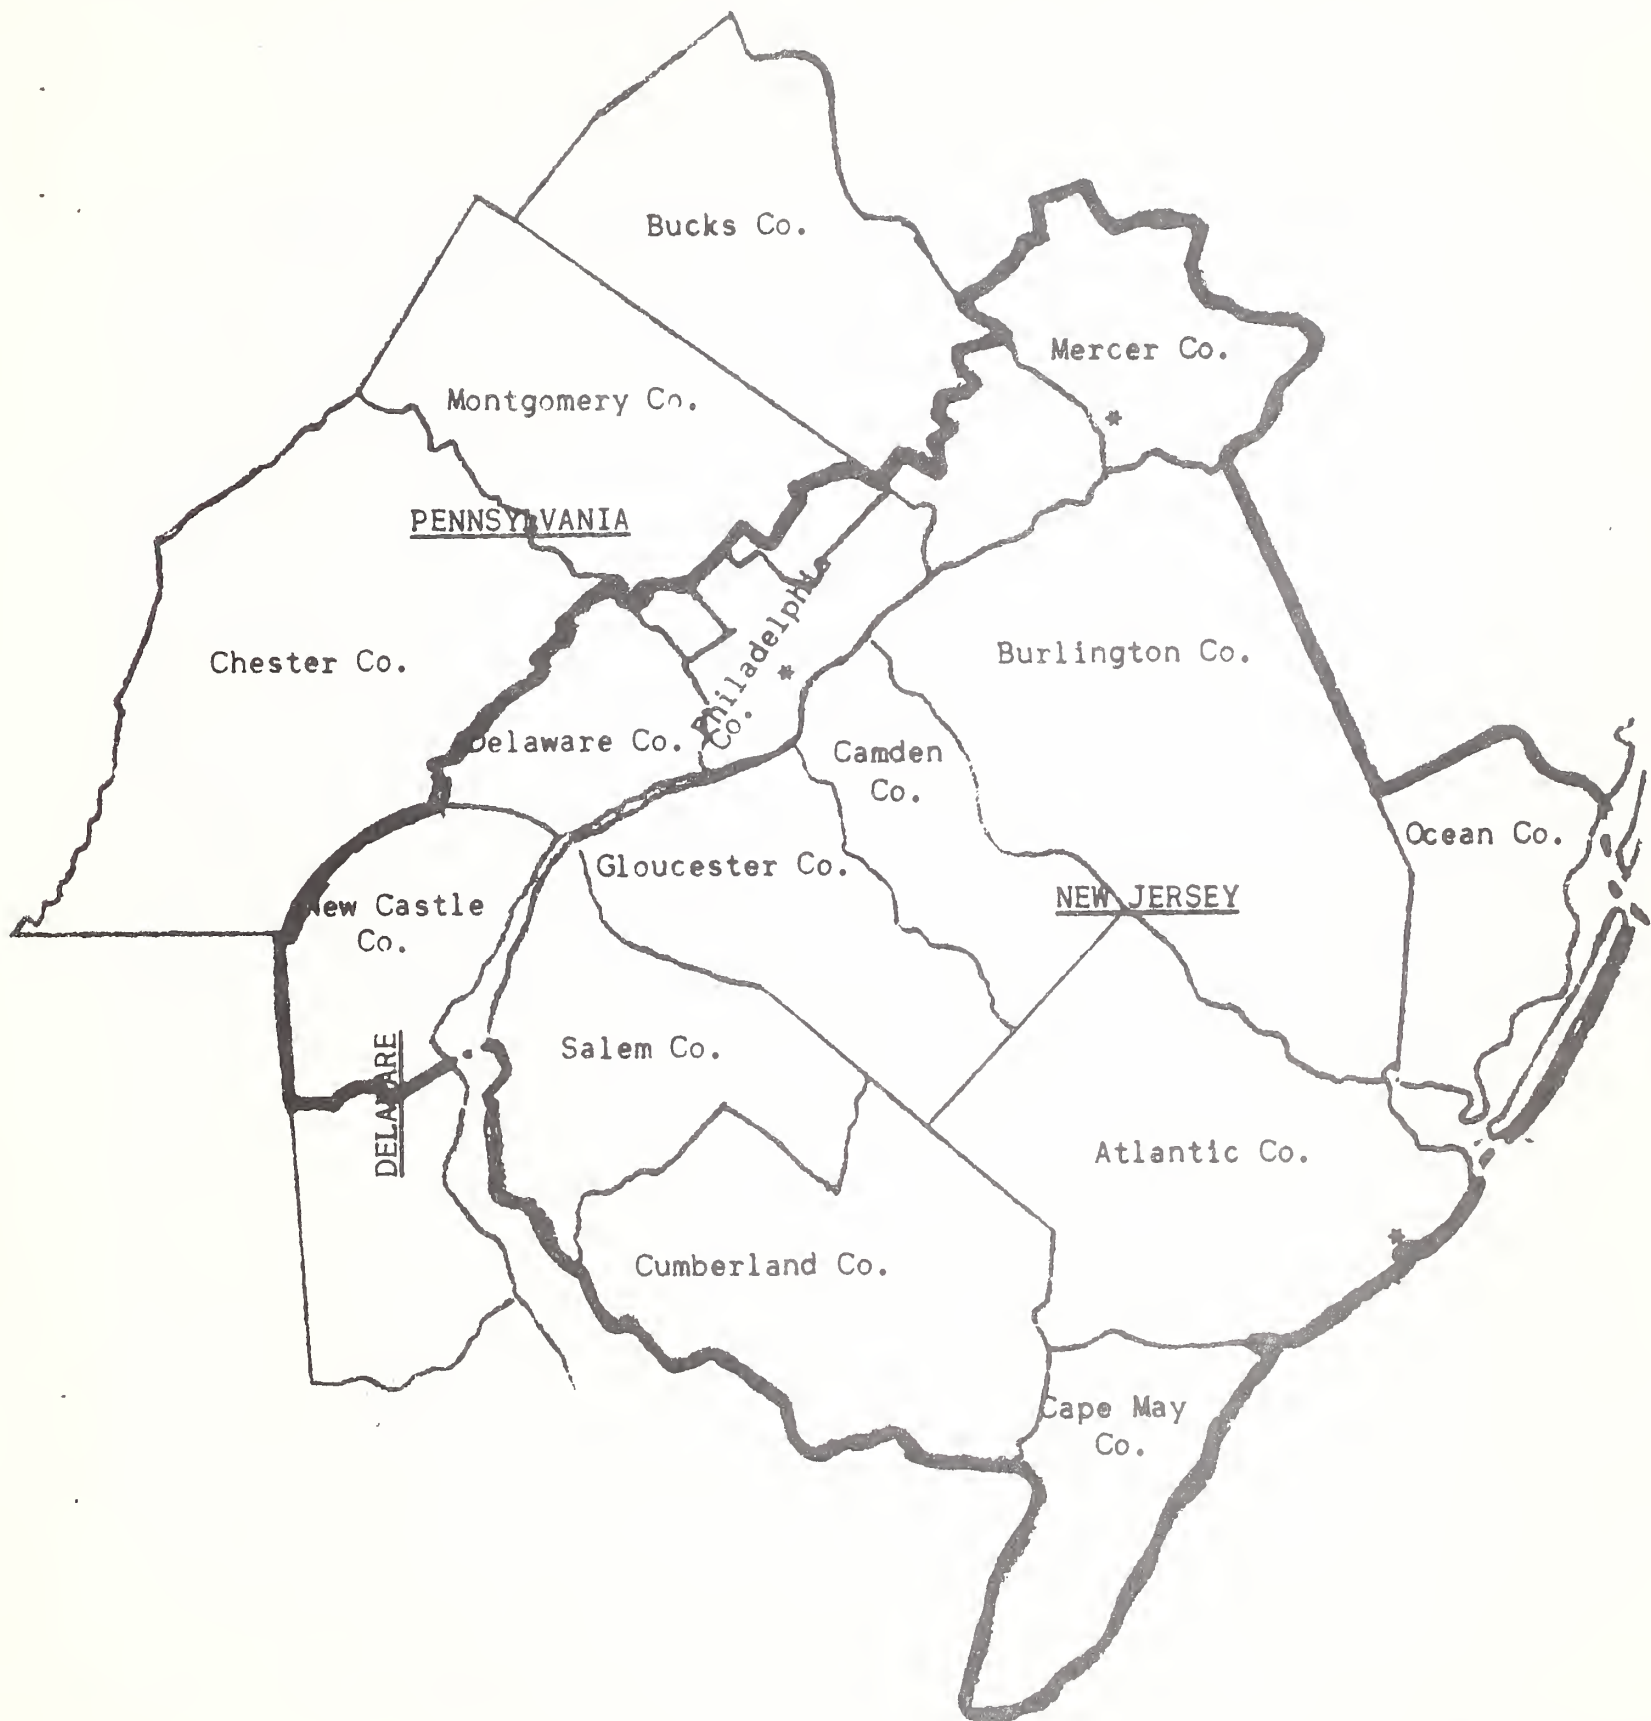

### Other Source Receipts

Additional receipts of milk (including skim, cream and milk equivalent of concentrated products) reported by Order No. 4 handlers were 2.2 million pounds from producer handlers and 148.0 million pounds from principally non-Order No. 4 sources. The quantity of other source receipts was 13.3 percent under 1964, but the proportion assigned to Class I milk (representing only milk receipts from other Federal orders) increased from 29 percent to 38 percent in 1965.

### Class I Milk Disposition

Fluid milk product disposition (as defined in Order No. 4) totaled 1,579.0 million pounds in 1965, with average daily sales of 4.32 million pounds. The 1964 daily mean was 4.37 million pounds of Class I milk. Route disposition in the marketing area, not including sales by producer handlers and other Federal order handlers, was practically unchanged yearly at 3.48 million pounds daily. The average number of producer milk plants regulated monthly in 1965 was 78, compared with 89 during the previous year.
